

how to create a voice

custom 12 steps · 36s

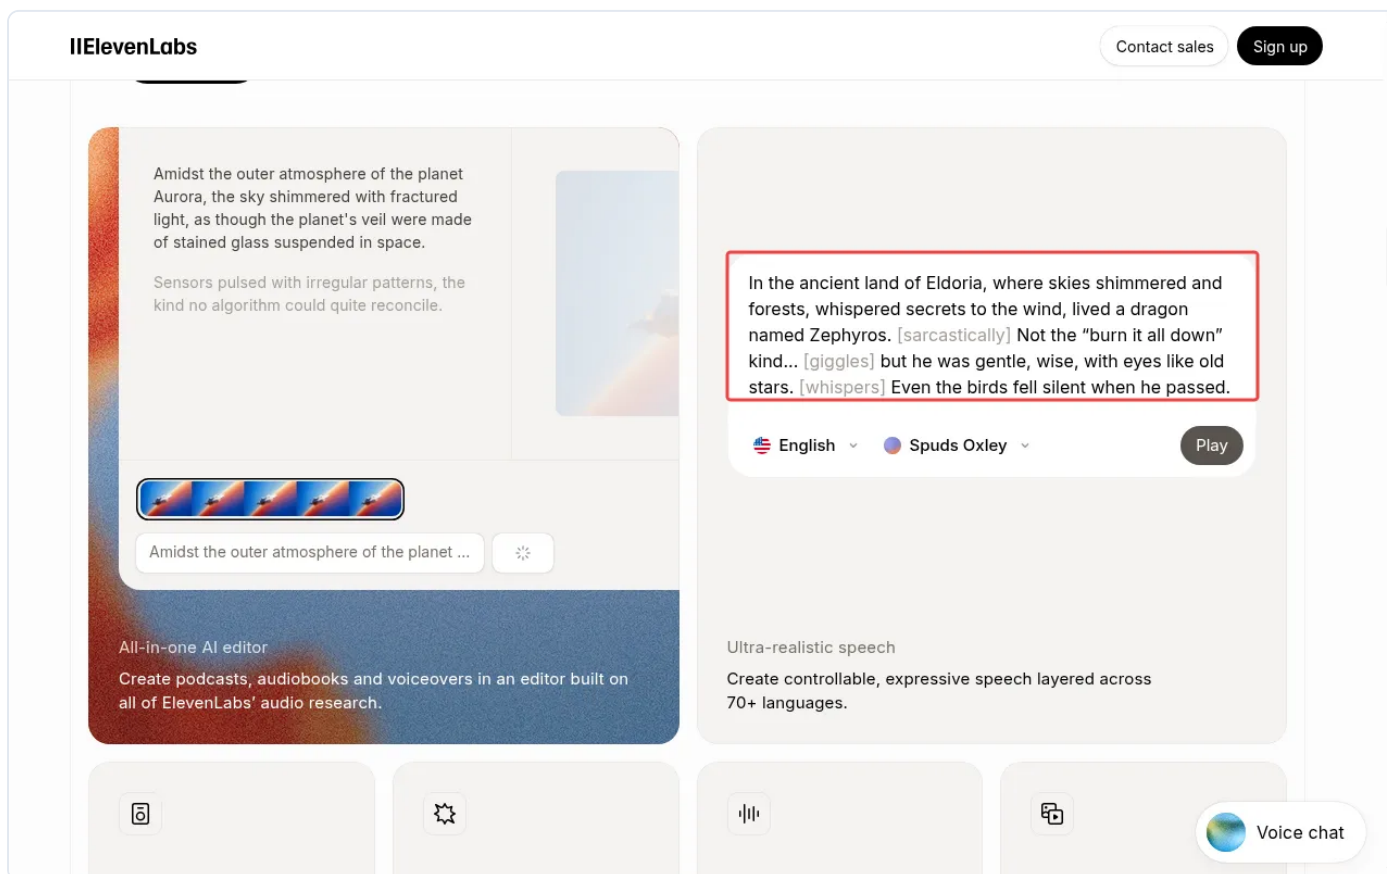

1 Click the AI Voice Generator tab

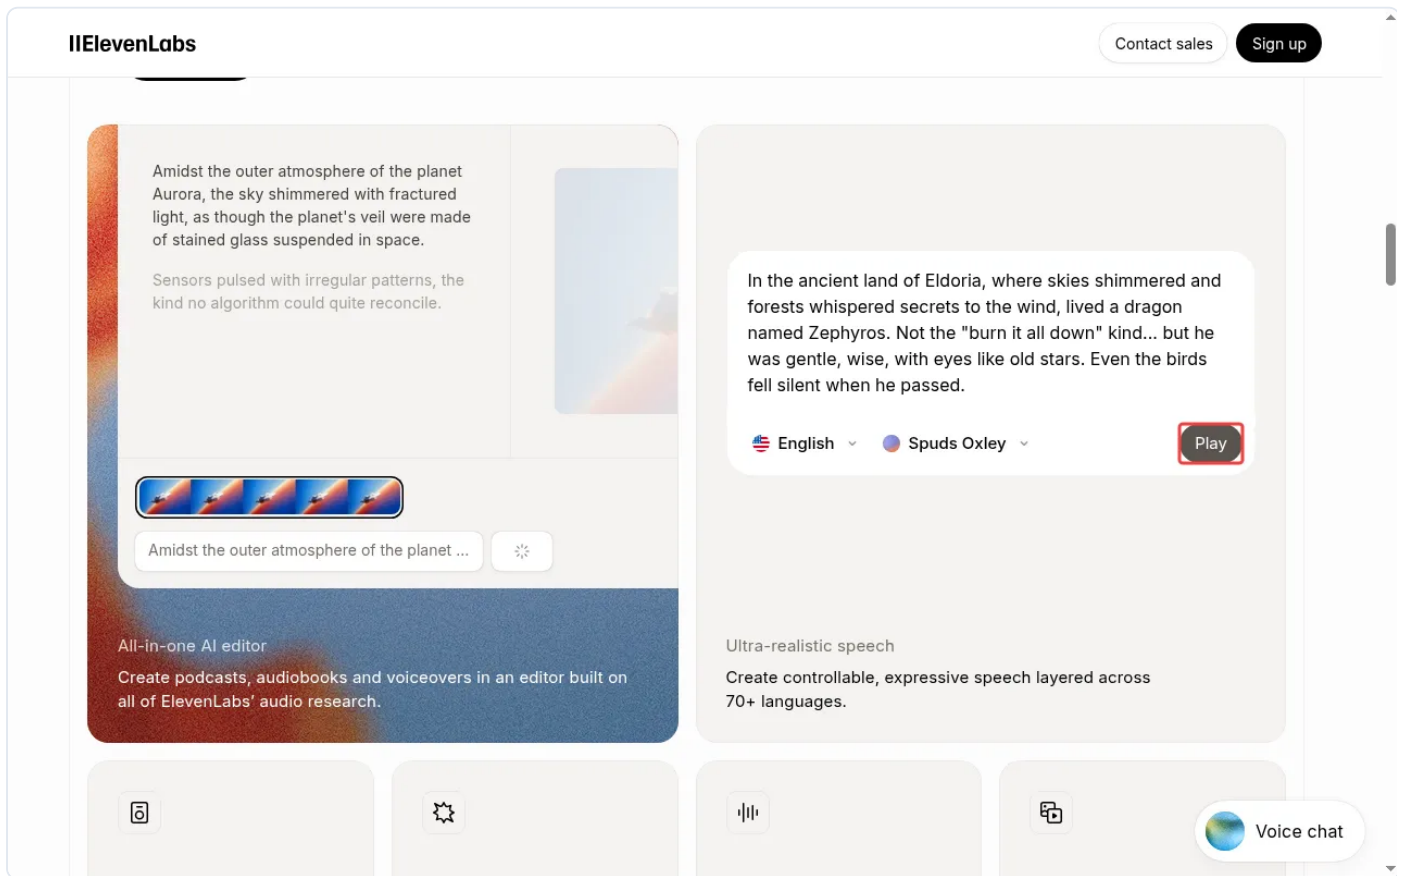

2 Click the Play button to preview the AI-generated voice

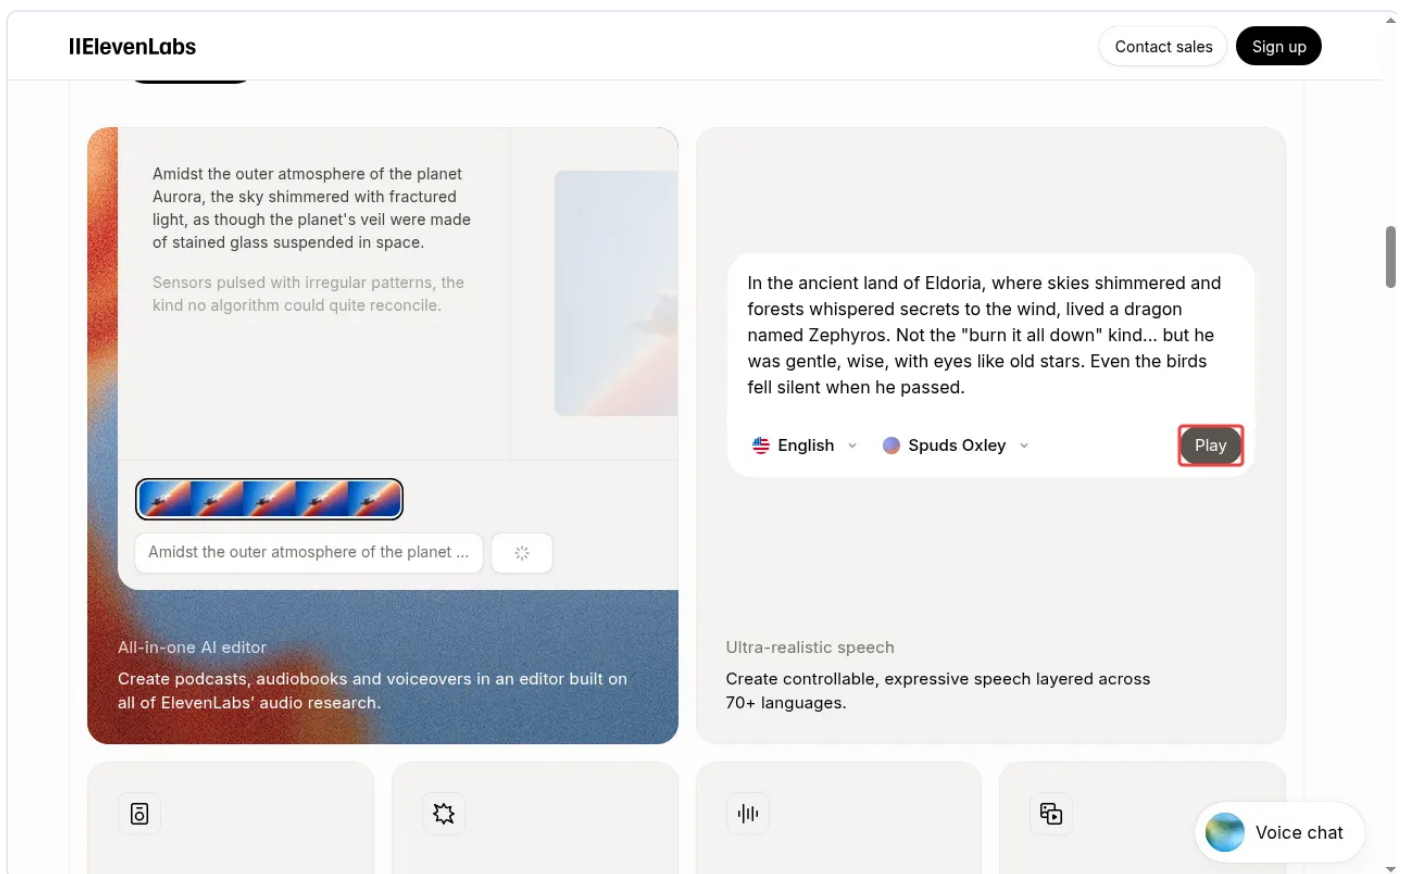

3 Type a story about a dragon named Zephyros in the text area

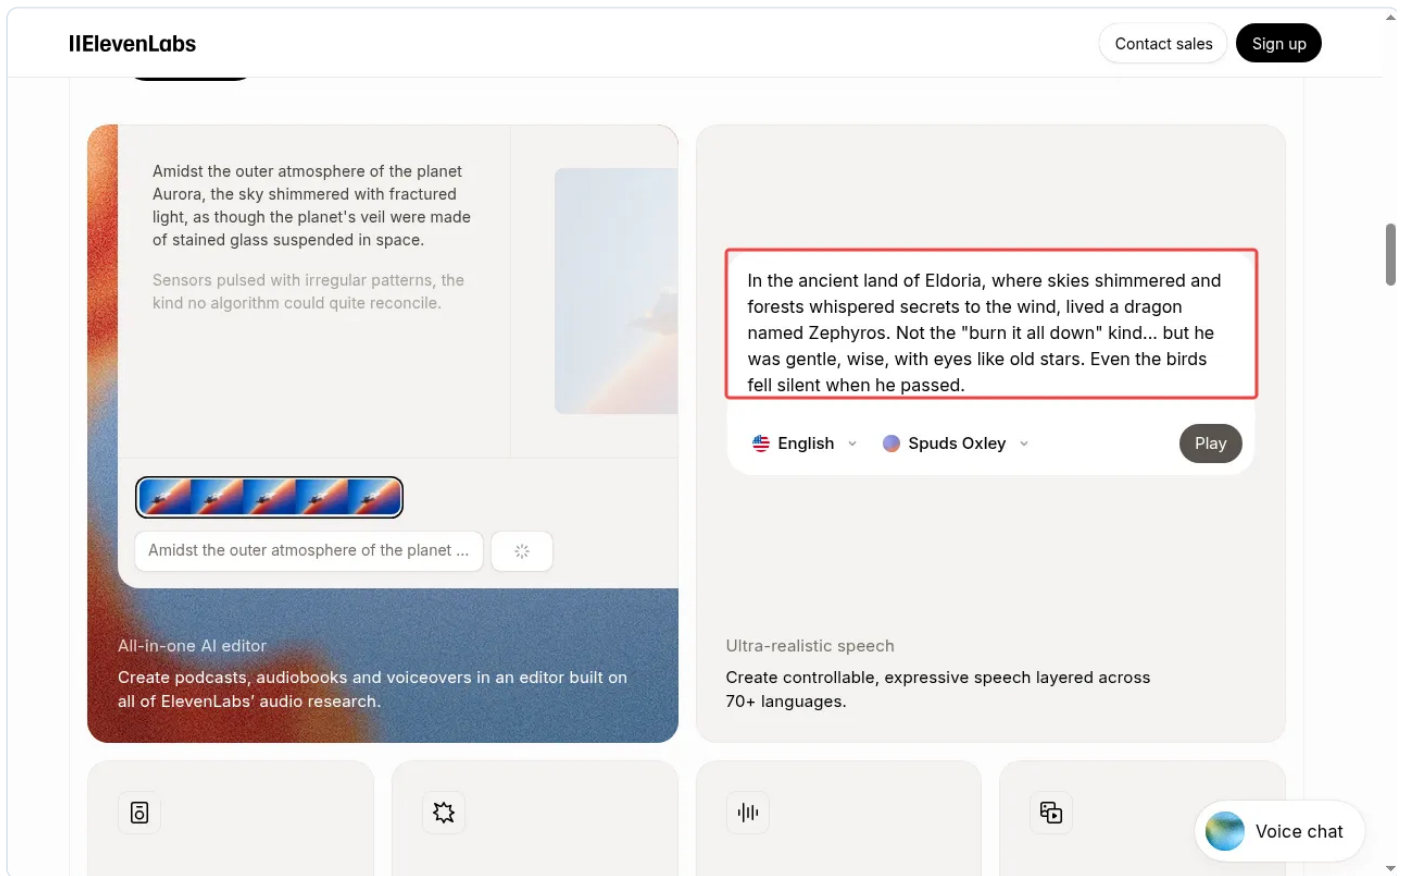

4 Click the Play button to preview the AI-generated voice

5 Click the Play button to preview the AI-generated voice

6 Type a story about a dragon named Zephyros

The screenshot shows the ElevenLabs website interface. At the top, there are links for "Contact sales" and "Sign up". The main content area is divided into two columns. The left column features a large text input field with the placeholder text "Amidst the outer atmosphere of the planet Aurora, the sky shimmered with fractured light, as though the planet's veil were made of stained glass suspended in space." Below the input field, there is a preview of the text and a "Play" button. The right column displays the text "In the ancient land of Eldoria, where skies shimmered and forests whispered secrets to the wind, lived a dragon named Zephyros. Not the 'burn it all down' kind... but he was gentle, wise, with eyes like old stars. Even the birds fell silent when he passed." Below this text, there are dropdown menus for "English" and "Spuds Oxley", and a "Play" button. At the bottom, there is a navigation bar with icons for various features and a "Voice chat" button.

Amidst the outer atmosphere of the planet Aurora, the sky shimmered with fractured light, as though the planet's veil were made of stained glass suspended in space.

Sensors pulsed with irregular patterns, the kind no algorithm could quite reconcile.

7 Click the Play button to preview the AI-generated voice

This screenshot is identical to the one above, but with a red box highlighting the "Play" button next to the text "In the ancient land of Eldoria, where skies shimmered and forests whispered secrets to the wind, lived a dragon named Zephyros. Not the 'burn it all down' kind... but he was gentle, wise, with eyes like old stars. Even the birds fell silent when he passed." This button is the one that should be clicked to preview the AI-generated voice.
