Stepify

How to create a new scenario that watches for new emails and sends a Slack notification in Make

make 4 steps · 41s

1. Click 'Back to Home' to navigate away from this 404 error page and return to the website builder interface where Hero blocks can be added and edited.

2. Click 'Get started free' in the top-right corner of the page to access the website builder where Hero blocks can be added and edited.

3. Click the X (close) button in the top-right corner of 'Automate anything! Let's begin.' modal to close this onboarding dialog and return to the main Make interface. The X button is located at the upper-right of the white modal overlay.

4. Click the large purple plus (+) button in the center of the canvas to open the module selection interface.
